Trischel Fabric (Pvt) Ltd

Security Audit

TRISCHEL FABRIC

BEST PACIFIC  MAS

About the Client

Trischel Fabric (Pvt) Ltd is a leading textile manufacturer in Sri Lanka, renowned for its innovation, sustainability, and high-quality fabric production. Serving both local and international markets, Trischel combines advanced manufacturing technology with eco-friendly practices to meet the evolving demands of the global apparel industry.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to offer a **comprehensive Cybersecurity Audit** for **Trischel Fabric (Pvt) Ltd**. This audit will assess your entire digital infrastructure, including networks, systems, endpoints, and user practices, to identify vulnerabilities, policy gaps, and compliance risks. Our team will conduct an in-depth analysis aligned with international cybersecurity frameworks to ensure a complete understanding of your security posture.

Following the assessment, we will provide Trischel with a detailed report outlining current risks, prioritized recommendations, and a roadmap to strengthen defenses across all digital assets. This includes guidance on secure configurations, access controls, data protection, threat detection, and incident response readiness. Our goal is to equip Trischel Fabric with the insights and tools needed to achieve long-term cyber resilience while maintaining operational efficiency and compliance. With HashX as your cybersecurity partner, you gain a clear path to a safer, more secure digital future.

Overseas Realty (Ceylon) PLC

Managed Security + GRC

About the Client

Overseas Realty (Ceylon) PLC is a leading real estate company in Sri Lanka, best known as the owner, developer, and manager of iconic properties such as the World Trade Center Colombo. With a legacy of delivering high-quality commercial and residential real estate, the company plays a pivotal role in shaping Colombo's urban landscape.

About the Service

HashX (Pvt) Ltd partnered with **Overseas Realty (Ceylon) PLC** to provide enterprise-grade **Managed Security Services** along with a comprehensive **Governance, Risk & Compliance (GRC) framework**. Our managed security operations included continuous threat detection, endpoint monitoring, vulnerability management, and incident response, ensuring the resilience and protection of digital infrastructure across all operational layers of the organization.

To reinforce regulatory alignment and cyber risk posture, we implemented a full-fledged GRC model aligned with ISO 27001 and local compliance mandates. This involved the design and integration of policies, control registers, audit trails, risk matrices, and training sessions for internal teams. Our strategic focus was to embed security into every aspect of the enterprise, allowing Overseas Realty to operate with confidence and compliance in an increasingly complex digital environment.

Havelock City Mall

Managed Security + GRC

About the Client

Havelock City Mall is one of Sri Lanka's premier lifestyle destinations, offering a modern mix of retail, dining, and entertainment experiences. Located in the heart of Colombo, the mall is part of the larger Havelock City development and serves as a vibrant hub for both local shoppers and international visitors.

About the Service

At **HashX (Pvt) Ltd**, we are proud to deliver a comprehensive **Managed Security Services** and **Governance, Risk & Compliance (GRC)** solution to **Havelock City Mall**. Our managed services ensure the protection of digital infrastructure through 24/7 threat monitoring, endpoint defense, real-time incident response, and vulnerability management—safeguarding operational integrity across customer-facing and internal systems.

In parallel, we will implement a tailored GRC framework designed to align Havelock City Mall's operations with international standards such as ISO 27001 and regional data protection laws. This includes defining policies, risk assessment protocols, audit readiness, and compliance tracking mechanisms. Our goal is to create a secure, resilient, and compliant digital environment that supports daily operations and enhances customer trust. With HashX as your cybersecurity partner, Havelock City Mall gains a future-ready defense strategy that integrates technology, risk management, and regulatory excellence.

World Trade Center Colombo

Managed Security + GRC

About the Client

The World Trade Center Colombo is one of Sri Lanka's most iconic commercial landmarks, offering premium office spaces and business facilities in the heart of the capital. As part of the global World Trade Centers Association, it serves as a hub for international trade, finance, and enterprise.

About the Service

At **HashX (Pvt) Ltd**, we are honoured to partner with the **World Trade Center Colombo** to deliver a robust combination of **Managed Security Services** and **Governance, Risk, and Compliance (GRC)** implementation. Our managed services ensure 24/7 monitoring, real-time threat detection, endpoint protection, and proactive vulnerability management—safeguarding critical infrastructure from evolving cyber threats.

In parallel, we will implement a tailored GRC framework aligned with international standards such as ISO 27001. This includes defining risk management processes, formalizing security governance, ensuring policy compliance, and enhancing audit readiness. Our objective is to provide the WTC Colombo with an end-to-end cybersecurity and compliance solution that protects business continuity, reinforces stakeholder trust, and aligns with regulatory and operational excellence. With HashX as your strategic partner, WTC gains a secure and compliant digital foundation to support global business operations confidently.

TEG Holdings (PVT) LTD

Managed Security + GRC

About the Client

TEG Holdings (Pvt) Ltd is a diversified business group in Sri Lanka, engaged in multiple industries that drive economic progress and enterprise development. With a forward-looking approach and a commitment to operational excellence, TEG Holdings continues to strengthen its position as a trusted leader in its respective sectors, contributing significantly to national and regional business growth.

About the Service

At **HashX (Pvt) Ltd**, we are privileged to collaborate with **TEG Holdings (Pvt) Ltd** to deliver comprehensive **Managed Security Services** designed to safeguard their digital infrastructure and critical business operations. Our managed services provide 24/7 monitoring, advanced threat detection, endpoint protection, and proactive vulnerability management. By combining continuous oversight with adaptive defence mechanisms, we ensure that TEG Holdings is protected against the rapidly evolving landscape of cyber threats.

Our approach focuses on minimising operational risks, strengthening data security, and ensuring uninterrupted business continuity. With a dedicated team of security experts and state-of-the-art technologies, HashX enables TEG Holdings to operate with confidence while maintaining resilience in the face of today's complex cyber challenges. Together, we are building a secure and future-ready digital foundation that supports long-term growth and innovation.

Tropical Holdings (pvt) ltd

Awareness Session

About the Client

Tropical Holdings (Pvt) Ltd is a dynamic Sri Lankan enterprise engaged in diverse business ventures across multiple industries. With a strong commitment to innovation and sustainable growth, Tropical Holdings continues to play an integral role in advancing business excellence and contributing to the nation's economic development..

About the Service

At **HashX (Pvt) Ltd**, we are delighted to partner with **Tropical Holdings (Pvt) Ltd** to deliver a **Cybersecurity Awareness Session** designed to strengthen their workforce's resilience against digital threats. Our programme focuses on equipping employees with the knowledge and practical skills required to identify, prevent, and respond effectively to cyber risks.

The session covers essential topics such as phishing awareness, safe online practices, password hygiene, data protection, and incident reporting procedures. By fostering a culture of security awareness, we aim to transform employees into the first line of defence, reducing the likelihood of human error and enhancing overall organisational security posture.

Through interactive learning, real-world case studies, and tailored guidance, HashX empowers Tropical Holdings to build a vigilant and security-conscious workforce—ensuring long-term protection of their critical operations and stakeholder trust.

Tropical Venture

Awareness Session

About the Client

Tropical Venture is an emerging business entity in Sri Lanka, dedicated to growth, innovation, and operational excellence across its chosen fields. With a progressive outlook and a commitment to sustainable practices, Tropical Venture is shaping its journey as a reliable contributor to the nation's economic development and corporate landscape.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to collaborate with **Tropical Venture** to deliver a **Cybersecurity Awareness Session** aimed at cultivating a security-first mindset across the organisation. This initiative is designed to empower employees with the knowledge and practical awareness necessary to recognise and mitigate cyber risks in their daily operations.

The session focuses on critical areas such as phishing prevention, safe internet and email practices, secure password management, data handling, and incident response protocols. By raising awareness and embedding best practices, we help reduce the risk of human error—the most common cause of security breaches—while fostering a culture of accountability and vigilance.

With HashX as a trusted partner, Tropical Venture gains not only stronger defences against evolving threats but also a well-informed workforce ready to protect business continuity and maintain stakeholder trust.

Dinro Holdings pvt ltd

Awareness Session

About the Client

Dinro Holdings (Pvt) Ltd is a forward-looking Sri Lankan business group engaged in diverse sectors, driving innovation and sustainable growth. With a commitment to excellence and corporate responsibility, Dinro Holdings continues to play an active role in strengthening the nation's economic progress and business landscape.

About the Service

At **HashX (Pvt) Ltd**, we are proud to partner with **Dinro Holdings (Pvt) Ltd** to deliver a **Cybersecurity Awareness Session** designed to strengthen their organisation's resilience against modern digital threats. The programme equips employees with the essential knowledge and practical skills needed to identify, avoid, and respond effectively to potential cyber risks.

The session addresses key areas such as phishing awareness, safe browsing and email practices, password hygiene, secure data handling, and incident reporting protocols. By empowering staff to act as the first line of defence, this initiative minimises the risk of human error and reinforces the company's overall security posture.

Through interactive learning and real-world examples, HashX helps Dinro Holdings build a security-conscious workforce—ensuring operational continuity, protecting sensitive information, and fostering stakeholder confidence.

DP Leisure

Awareness Session

About the Client

DP Leisure is a well-recognised Sri Lankan enterprise, operating within the leisure and hospitality sector. With a strong commitment to customer experience, service excellence, and sustainable growth, DP Leisure continues to play a key role in promoting Sri Lanka's reputation as a leading destination for recreation and hospitality.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to collaborate with **DP Leisure** to conduct a **Cybersecurity Awareness Session** focused on empowering employees with the knowledge and awareness required to safeguard the organisation from evolving cyber threats. This initiative is designed to reduce vulnerabilities caused by human error and to establish a culture of security mindfulness across the workforce.

The programme highlights critical areas such as phishing and social engineering attacks, safe internet usage, password best practices, secure handling of sensitive data, and incident response guidelines. Through engaging delivery methods and practical examples, participants are trained to recognise risks early and adopt security-first behaviours in their daily activities.

With this awareness session, HashX helps DP Leisure build a vigilant and informed workforce that enhances the company's resilience, protects its digital assets, and ensures business continuity.

Euro Substrates (pvt) ltd

Awareness Session

About the Client

Euro Substrates (Pvt) Ltd is a globally recognised Sri Lankan enterprise specialising in high-quality coir-based growing media solutions. With a strong presence in international markets and a commitment to innovation and sustainability, Euro Substrates continues to play a leading role in advancing environmentally friendly agricultural solutions worldwide.

About the Service

At **HashX (Pvt) Ltd**, we are honoured to work with **Euro Substrates (Pvt) Ltd** in delivering a **Cybersecurity Awareness Session** designed to enhance employee vigilance and strengthen organisational resilience against cyber threats. This initiative equips staff with practical skills and essential knowledge to identify, mitigate, and respond effectively to potential risks in their daily operations.

The session covers critical areas including phishing and social engineering awareness, secure password practices, safe use of digital communication channels, data protection, and incident response protocols. By embedding these best practices, we help reduce human-factor vulnerabilities—the leading cause of cyber incidents—and foster a culture of proactive security.

Through interactive training and real-world case insights, HashX supports Euro Substrates in building a security-conscious workforce, thereby protecting digital assets, maintaining business continuity, and safeguarding stakeholder trust.

About the Client

Seylan Bank PLC is one of Sri Lanka's leading commercial banks, known for its customer-centric approach and innovation in digital banking. With a strong presence across retail, corporate, and SME sectors, Seylan Bank continuously invests in secure, technology-driven financial services to support national economic growth.

About the Service

At **HashX (Pvt) Ltd**, we are proud to assist **Seylan Bank** by conducting comprehensive **security audits** on its banking web portals and APIs. This audit focuses on evaluating authentication mechanisms, data protection protocols, session handling, and backend integrations to uncover vulnerabilities that may expose sensitive customer data or critical banking operations. Our methodology aligns with OWASP, PCI DSS, and other banking security standards to ensure thorough and compliant assessments.

The findings from our audit will be compiled into a detailed technical report, along with actionable remediation guidance tailored for rapid implementation by internal teams. We also provide insights into industry best practices for secure API development and web application hardening. Our goal is to enhance the digital trust and resilience of Seylan Bank's platforms, ensuring that customers enjoy seamless and secure banking experiences. With HashX as your trusted cybersecurity partner, Seylan gains deep expertise and a proactive approach to threat mitigation.

Z Messenger

Manage Security + PDPA

About the Client

Z Messenger is a leading integrated marketing communications agency in Sri Lanka, specializing in event management, digital marketing, public relations, and strategic brand campaigns. With a reputation for creativity and executional excellence, Z Messenger supports both local and international clients in navigating the evolving communications landscape.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to support **Z Messenger** with a tailored package of **Managed Security Services and PDPA Compliance Consulting**. Our managed services provide continuous protection through real-time threat monitoring, vulnerability management, incident response, and system hardening, ensuring Z Messenger's digital infrastructure remains secure, agile, and resilient in a fast-paced business environment.

Alongside, we guide Z Messenger toward full compliance with the Personal Data Protection Act (PDPA) by assessing current data handling practices, identifying gaps, and implementing privacy-by-design principles across operations. This includes drafting internal policies, enabling data subject rights, and establishing data governance frameworks. Our objective is to help Z Messenger maintain the trust of its clients while ensuring legal and regulatory alignment. With HashX as your cybersecurity and compliance partner, Z Messenger gains the confidence and capability to operate securely and ethically in today's data-driven world.

Infinite Business Ventures

Data Breach Investigation

About the Client

Infinite Business Ventures is a dynamic and forward-thinking company specializing in innovative business solutions across multiple sectors. With a focus on digital transformation, operational efficiency, and strategic growth, the company empowers clients to stay ahead in competitive markets through technology-driven services and a commitment to excellence.

About the Service

At **HashX (Pvt) Ltd**, we are committed to supporting **Infinite Business Ventures** through a comprehensive cybersecurity investigation following the recent breach. Our specialized team will conduct an in-depth forensic analysis to determine the source, method, and full scope of the incident. By leveraging advanced tools and methodologies, we aim to identify compromised systems, assess potential data exposure, and contain the threat promptly to prevent further damage. All digital evidence will be preserved in accordance with legal and regulatory standards to support any necessary compliance or legal actions.

Beyond immediate response, our focus is on long-term resilience. We will provide Infinite Business Ventures with tailored recommendations to strengthen cybersecurity posture, address vulnerabilities, and implement preventive controls. Our goal is not only to restore operational integrity but also to enhance your defense mechanisms against future threats. With HashX as your trusted partner, you gain the expertise and assurance needed to move forward securely and confidently in today's evolving digital landscape.

Walks of Dubai

Security Audit

About the Client

Walks of Dubai is a premier tour operator offering curated walking tours and immersive cultural experiences across Dubai. With a focus on authenticity, hospitality, and personalized service, Walks of Dubai connects travelers with the rich heritage, vibrant neighborhoods, and modern marvels that define one of the world's most dynamic cities.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to offer **Walks of Dubai** a complete **Cybersecurity Audit** combined with a tailored **Governance, Risk, and Compliance (GRC) framework**. Our audit will assess your entire digital infrastructure—including systems, networks, cloud services, and business applications—to identify vulnerabilities, misconfigurations, and compliance gaps. This assessment is aligned with global cybersecurity standards to ensure a comprehensive evaluation of your risk exposure.

In parallel, we will design and implement a GRC framework customized to your operational needs. This includes developing information security policies, defining risk management protocols, ensuring regulatory alignment (such as with GDPR or regional laws), and establishing ongoing governance practices. Our aim is to not only strengthen your security posture but also support your long-term compliance and risk management goals. With HashX as your cybersecurity partner, Walks of Dubai gains a strategic ally in securing digital assets while maintaining customer trust and business continuity.

MEASA Consulting

Security Audit

About the Client

Measa is a global lifestyle and wellness brand offering a curated selection of premium skincare, wellness, and personal care products. With a strong emphasis on sustainability, innovation, and customer experience, Measa blends nature and science to promote holistic wellbeing and elevate everyday self-care routines.

About the Service

At **HashX (Pvt) Ltd**, we are proud to partner with **Measa** to conduct a comprehensive **Cybersecurity Audit** alongside the implementation of a robust **Governance, Risk, and Compliance (GRC)** framework. Our audit will assess Measa's entire digital ecosystem—networks, cloud platforms, endpoints, and data workflows—to uncover vulnerabilities, evaluate existing controls, and benchmark your security posture against international standards.

Following the audit, we will tailor and implement a GRC strategy to align Measa's operations with global best practices and regulatory requirements. This includes developing security policies, defining risk treatment plans, setting up compliance tracking mechanisms, and enhancing overall governance. Our goal is to help Measa build a resilient, compliant, and secure environment that supports growth and protects brand integrity. With HashX as your cybersecurity partner, Measa gains not only clarity in its current risk landscape but also the strategic support needed for long-term digital trust and sustainability.

CYBIX CONSULTATION

Managed Service

CYBIX
CONSULTING

About the Client

Cybox Consultation is a specialized consultancy firm focused on delivering strategic IT and business transformation solutions. With a strong emphasis on digital efficiency, innovation, and compliance, Cybox empowers organizations to scale securely while aligning technology with long-term business goals.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to offer **Cybox Consultation** a combined solution of **Managed Cybersecurity Services and a Full Cybersecurity Audit**. This partnership begins with a deep audit of Cybox's entire IT landscape—networks, systems, cloud infrastructure, and endpoint devices—identifying existing vulnerabilities, compliance gaps, and areas for enhancement. Our audit is aligned with leading industry frameworks such as ISO 27001 and NIST, ensuring a complete and objective assessment.

Following the audit, our Managed Services will provide Cybox with continuous, real-time protection and oversight. This includes 24/7 threat monitoring, proactive vulnerability management, patching, incident response support, and compliance tracking. Our aim is to deliver peace of mind by ensuring Cybox's systems remain secure, resilient, and up to date. With HashX as your cybersecurity partner, Cybox Consultation gains not just a service—but a strategic shield to ensure operational continuity and long-term digital confidence.

Be Dapper

Data Breach Investigation

About the Client

Be Dapper is a premium Sri Lankan lifestyle and grooming brand offering high-quality apparel, accessories, and grooming essentials for men. Known for its stylish and contemporary collections, Be Dapper has built a strong digital presence and loyal customer base through its commitment to excellence, authenticity, and customer satisfaction.

About the Service

At **HashX (Pvt) Ltd**, we are equipped to support **Be Dapper** through a meticulous Data Breach Investigation following the recent cybersecurity incident. Our specialist team will conduct a full forensic assessment to identify the cause, entry point, and extent of the breach, while evaluating potential data exposure and compromised systems. All findings will be carefully documented and preserved in accordance with legal and compliance standards, ensuring transparency and readiness for any regulatory follow-up.

Following containment and recovery, we will provide Be Dapper with a detailed incident report and practical recommendations to strengthen your cybersecurity posture. This includes addressing discovered vulnerabilities, tightening access controls, and improving incident response strategies. Our goal is to restore system trust, safeguard customer data, and reinforce your brand's digital resilience. With HashX as your cybersecurity partner, Be Dapper will benefit from expert-led recovery and long-term protection in today's complex threat landscape.

Safety Sure

Data Breach Investigation

About the Client

Safety Sure is a trusted Sri Lankan provider of personal protective equipment (PPE), workplace safety gear, and industrial safety solutions. Renowned for quality, reliability, and industry compliance, Safety Sure serves a wide range of sectors including construction, manufacturing, and healthcare, ensuring the protection and wellbeing of workers across the nation.

About the Service

At **HashX (Pvt) Ltd**, we are committed to assisting **Safety Sure** with a thorough **Data Breach Investigation** following the recent cybersecurity incident. Our expert team will conduct a detailed forensic analysis to uncover how the breach occurred, identify the affected systems and data, and assess the scope of the compromise. Using advanced investigative tools and methodologies, we aim to contain the incident, prevent further damage, and preserve all relevant evidence in a legally defensible manner.

Beyond containment, we will provide Safety Sure with a comprehensive incident report and expert recommendations to enhance its cybersecurity posture. This includes remediating vulnerabilities, reinforcing access controls, and improving monitoring and response procedures. Our goal is to restore confidence in Safety Sure's digital environment and help protect its reputation, customer data, and operational continuity. With HashX as your cybersecurity partner, you gain trusted support to navigate the breach response and strengthen future resilience.

About the Client

Allianz Lanka is a leading insurance provider in Sri Lanka and a member of the global Allianz Group. The company offers a wide range of insurance solutions including life, health, motor, and corporate insurance, combining local expertise with global strength to deliver trusted financial protection.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to provide **Allianz Lanka** with expert **Cybersecurity Consultation** services tailored to the unique needs of the financial and insurance sector. Our consultation process begins with a comprehensive assessment of your current security architecture, policies, and risk posture. We focus on identifying vulnerabilities, evaluating control effectiveness, and aligning cybersecurity strategies with regulatory and industry standards.

Based on our findings, we will deliver a strategic roadmap with practical, prioritized recommendations to strengthen Allianz's cyber resilience. This includes guidance on secure infrastructure, threat mitigation, access management, incident response readiness, and compliance with local and global regulations. Our objective is to empower Allianz with a proactive security posture that safeguards sensitive data, ensures operational continuity, and upholds client trust. With HashX as your cybersecurity advisor, Allianz gains a partner committed to delivering insight-driven, future-ready security solutions.

DATA CORE

Consultation

DATA CORE

About the Client

DataCore is a global leader in software-defined storage and data infrastructure solutions, empowering enterprises to achieve high-performance, resilient, and flexible data environments. With a focus on storage virtualization, data protection, and intelligent management, DataCore enables organizations to optimize IT operations and accelerate digital transformation.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to extend our **Cybersecurity Consultation services** to **DataCore**, aimed at enhancing the security posture of its mission-critical infrastructure. Our engagement begins with a thorough analysis of existing systems, architecture, and controls to identify vulnerabilities, misconfigurations, and potential compliance gaps. Special attention is given to secure storage layers, data movement, access privileges, and risk management practices.

Based on our findings, we will deliver a tailored cybersecurity strategy aligned with industry frameworks such as NIST and ISO 27001. This includes recommendations for improving threat detection, hardening endpoints, establishing secure access protocols, and enhancing incident response procedures. We also provide guidance on aligning security operations with evolving data protection regulations. With HashX as a strategic advisor, DataCore gains actionable insights and expert support to maintain the confidentiality, integrity, and availability of its services—ensuring secure innovation in today's complex digital environment.

Giggles Lanka

Data Breach Investigation

About the Client

Giggles is a leading Sri Lankan brand known for its innovative baby care products and dedication to quality and safety. With a strong online presence and a growing customer base, Giggles offers a wide range of trusted products designed to support the wellbeing of infants and young children.

About the Service

At **HashX (Pvt) Ltd**, we are ready to assist **Giggles** with a comprehensive Data Breach Investigation to assess and address the recent cybersecurity incident. Our expert team will carry out a detailed forensic analysis to identify how the breach occurred, what data was exposed or accessed, and the systems affected. Using industry-leading tools and threat intelligence, we aim to contain the breach, secure your environment, and ensure all findings are preserved in a compliant and legally defensible manner.

In addition to managing the immediate impact, we will provide Giggles with a full incident report, including actionable recommendations to prevent future breaches. This will cover patching vulnerabilities, reviewing access controls, and strengthening incident response protocols. Our objective is to restore confidence in your systems and reinforce your brand's digital integrity. With HashX as your cybersecurity partner, Giggles gains the assurance of expert-led recovery and lasting protection.

Sri Lanka Army

Consultation

About the Client

The **Sri Lanka Army** is the primary land force of the nation's armed forces, dedicated to safeguarding national security, territorial integrity, and public stability. With growing reliance on digital infrastructure, the Army continues to evolve its cyber capabilities to protect critical military and operational assets.

About the Service

At **HashX (Pvt) Ltd**, we are honoured to provide **the Sri Lanka Army** with **Private Cybersecurity Consultation services**, designed to enhance the confidentiality, integrity, and availability of critical defense systems. Our approach begins with a discreet and thorough assessment of existing digital infrastructure, security frameworks, and cyber risk exposure across operational and classified environments. The objective is to ensure that every layer of digital defense meets military-grade standards.

Following this assessment, our consultants will deliver a tailored strategy that includes advanced threat mitigation, secure system architecture, access control governance, and incident readiness planning. We will also advise on compliance with national cyber directives and international defense standards. This collaboration is conducted under strict confidentiality, respecting the strategic sensitivity of military operations. With HashX, the Sri Lanka Army gains a trusted cybersecurity partner committed to supporting national defense with world-class, mission-critical expertise.

Poly Packaging Services

Investigation

About the Client

Poly Packaging Services (PPS) is a well-established Sri Lankan company specializing in high-quality, sustainable packaging solutions for a variety of industries including food, retail, and manufacturing. With a strong commitment to innovation, quality control, and environmental responsibility, PPS has earned a trusted reputation both locally and internationally.

About the Service

At **HashX (Pvt) Ltd**, we are proud to assist **Poly Packaging Services** with a comprehensive **Cybersecurity Investigation** in response to a suspected incident or breach. Our expert team will perform an in-depth forensic analysis to identify the origin, method, and scope of the compromise—focusing on affected systems, unauthorized access, and potential data exposure. All evidence will be preserved according to legal and regulatory standards to support further action or internal reporting.

Beyond identifying the cause, we will deliver a detailed incident report along with clear, actionable recommendations to prevent recurrence. This includes suggestions on patching vulnerabilities, strengthening system monitoring, and updating internal response protocols. Our goal is to ensure PPS regains operational integrity swiftly while building resilience against future threats. With HashX as your cybersecurity partner, Poly Packaging Services gains a trusted advisor dedicated to safeguarding your digital infrastructure and brand reputation.

About the Client

CYCLOUD is a cutting-edge cloud solutions provider, offering secure, scalable, and intelligent IT infrastructure services tailored for modern businesses. With a strong focus on digital transformation, automation, and performance, CYCLOUD empowers organizations across sectors to innovate confidently in the cloud.

About the Service

At **HashX (Pvt) Ltd**, we are pleased to support **CYCLOUD** with **expert Cybersecurity Consultation** services to strengthen the security and compliance of its cloud-based operations. Our engagement begins with a comprehensive evaluation of CYCLOUD's infrastructure, applications, and data environments to identify vulnerabilities, assess risk posture, and validate security controls aligned with industry best practices.

Based on our assessment, we will deliver a tailored cybersecurity roadmap that includes practical recommendations to enhance cloud security, threat detection capabilities, identity and access management, and incident response readiness. We also ensure alignment with global compliance standards such as ISO 27001, GDPR, and industry-specific regulations. Our aim is to fortify CYCLOUD's services and protect its clients' trust by ensuring resilience and operational integrity across its cloud ecosystem. With HashX as a strategic advisor, CYCLOUD gains future-proofed cybersecurity insights to confidently scale in a rapidly evolving digital landscape.

ATHLAN TECHNOLOGIES

Consultation

About the Client

Athlan Technologies is a forward-thinking technology solutions provider specializing in software development, IT infrastructure, and digital innovation. Known for delivering tailored tech solutions across industries, Athlan combines agility, technical expertise, and customer-centricity to help businesses scale and thrive in a connected world.

About the Service

At **HashX (Pvt) Ltd**, we are proud to provide **Athlan Technologies** with **expert Cybersecurity Consultation services** to reinforce the security, resilience, and compliance of its digital operations. Our process begins with a comprehensive assessment of Athlan's IT architecture, policies, and risk exposure—identifying vulnerabilities, security gaps, and opportunities for control enhancement across the technology stack.

Following the assessment, we will deliver a strategic roadmap with tailored, actionable recommendations aligned with international standards such as ISO 27001 and NIST. This will cover areas including access management, secure software development practices, threat detection, incident response readiness, and regulatory alignment. Our goal is to empower Athlan Technologies with a mature, proactive cybersecurity posture that supports innovation while protecting assets and client trust. With HashX as your cybersecurity partner, you gain the insight and support needed to navigate an evolving threat landscape confidently and securely.
